SERVICE OFFERING

We have a number of interior design services that allow us to provide you with the option that best suits your needs and budget. Our aim is to provide timeless interiors that are tailored to your taste and are suitable for today's way of living. We do this by taking inspiration from classic designs and combining them with beautifully crafted luxury textiles, contemporary furniture and accessories. Our access to furniture manufacturers means you can invest in high-quality, custom-made furniture at reasonable prices.

ONLINE INTERIOR DESIGN SERVICE

The ideal service for those who may live in another location and/or are happy to take some ownership of the decorating process.

How it works:

- 1). We'll email you a questionnaire to ask about your project and any particular issues you may be facing. You will need to take accurate measurements of the room (and send us any plans you have), along with clear photos and a list of furniture and accessories you would like to keep, and then send them to us with the completed questionnaire.
- 2). Once we've reviewed your questionnaire, photos and plans, we'll arrange a 20-30 minute phone call to discuss your project further before moving to the design phase.
- 3). We'll create and email you a concept board, incorporating your pieces and our recommendations to purchase, including custom-made furniture and accessories from our manufacturers. We'll also send you fabric/wallpaper/paint samples in the post.
- 4). Although we aim to get the design concept right the first time, we want you to love it as much as we do, so you'll be given the opportunity for one revision.
- 5). Once you've approved everything, we'll organise the orders and deliveries to your home within agreed timeframes.

Fee per room \$750
